Objective

Highly motivated and detail-oriented individual seeking opportunities to apply my skills in software development, competitive programming, and web development.

Education

Bachelor of Technology (B.Tech), Computer Science Engineering

University Name, City, State

CGPA: 7.5 (till 4th semester)

Expected Graduation: Year

Technical Skills

- **Languages:** C/C++, JavaScript, HTML/CSS, SQL
- **Technologies:** Node.js, Express, MongoDB, MySQL, Socket.io
- **Tools:** Git, Docker, Kubernetes, Postman
- **Other:** Competitive Programming, Problem Solving

Projects

Multiplayer Gaming Arena

A real-time multiplayer game built with Node.js and Socket.io where users can compete in various games. Implemented real-time communication and player matching.

Dairy Inventory Management System

A web application built using Node.js and MySQL for tracking dairy product inventory, stock updates, and managing product details. Integrated MySQL triggers for stock limits.

Achievements

- Ranked in the top 100 in Google Code Jam 2023
- Solved over 500 problems on LeetCode and CodeForces
- Contributed a question accepted on LeetCode

Experience

Tech Coordinator

Rapid Programming Hub

Organized contests and workshops for students to improve their programming and problem-solving skills.

Interests

- Competitive Programming
- Software Development
- Technology Trends
